# Independent auditor's review report on the interim condensed financial statements at September 30, 2019

To the Management and Shareholders of **PPLA Participations Ltd.** São Paulo - SP

We have reviewed the interim condensed financial statements of **PPLA Participations Ltd. (Company)** as of September 30, 2019 and the related statements of income and the comprehensive income for the quarter and nine-month period then ended, and the changes in shareholders' equity and the cash flows for the nine-month period then ended, as well as a summary of the main accounting practices and other notes.

The Company's management is responsible for the fair presentation and preparation of the interim condensed financial statements in accordance with the International Accounting Standard IAS 34 – Interim Financial Reporting issued by the International Accounting Standards Board (IASB). Our responsibility is to express an opinion on the interim information based on our review.

## Scope of the review

We conducted our review in accordance with Brazilian and international standards for reviewing interim financial information (NBC TR 2410 and ISRE 2410 – "Review of Interim Financial Information Performed by the Independent Auditor of the Entity"). An interim review consists principally of applying analytical and other review procedures, and making enquiries of and having discussions with persons responsible for financial and accounting matters. An interim review is substantially less in scope than an audit conducted in accordance with auditing standards. An interim review does not provide assurance that we would become aware of any or all significant matters that might be identified in an audit. Accordingly, we do not express such an audit opinion.

#### Conclusion on the interim condensed financial statements

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed financial statements referred to above do not present fairly, in all material respects, in accordance with the International Accounting Standard IAS 34 – Interim Financial Reporting issued by the International Accounting Standards Board (IASB).

#### Other issues

#### Significant uncertainty

#### Auditor's report of PPLA Investments Ltd.

On September 30, 2019, PPLA Participations Ltd. has investments in the amount of R\$ 46 thousand in the Company PPLA Investments Ltd. evaluated by the equity method. The financial statements of this investment were audited by other independent auditors who issued a report dated November 13, 2019, without qualification, containing the paragraph of Significant uncertainty disclosed below:

#### **Going Concern**

The Company had a recurring reduction in shareholders' equity over the last years, mainly due to losses arising from negative mark-to-market in its portfolio of investments and the reversal of the deficit scenario depends on the success initiatives taken by management, including eventual capital contribution from shareholders. This situation indicates the existence of a relevant uncertainty that may raise significant doubt about its operational continuity. Our conclusion has no qualifications related to this matter.

In August, 2017, the Company's Board of Directors changed the corporate name of BTG Participations Ltd. to PPLA Participations Ltd., in order to clarifying the investors' understanding of the BPAC11 units and BBTG12 units (PPLA Participacions, currently PPLA11) in the context of the segregation held on August 21, 2017.

PPLA Participations (together with BTG Pactual, the "Group") have units listed on NYSE Euronext in Amsterdam and B3 in São Paulo. Each unit issued, corresponds to 1 class A shares and 2 class B shares of PPLA Participations Ltd. All units listed and traded in Amsterdam remained wholly interchangeable with the units in Brazil.

The Company is the sole owner of BTG Bermuda LP Holdco Ltd ("BTG Holdco") which, on December 29, 2010, received a Class C common share from BTG Pactual Management Ltd. and thus became general partner of PPLA Investments LP. #### **Discontinuation of the BDR Program**

During the year ended December 31, 2018, PPLA Participations Ltd. submitted to B3 S.A. - Brasil, Bolsa, Balcão ("B3") a procedure for the voluntary discontinuation of the BDRs Program of the Company, along with the resulting termination of its listing and negotiation of the Units with B3, as well as the termination of its registration as a category "A" foreign issuer, held with the Brazilian Securities and Exchange Commission – Comissão de Valores Mobiliários ("CVM"), pursuant to the Issuer Manual, issued by B3 and the CVM Instruction 332, of April 4, 2009.

Additionally, on May 2, 2019, as part of the tender offer for the purchase of Units and BDRs ("OPA" or "Offer"), the Securities Commission ("CVM") made the following requests: (i) amendment of the tender offer to include information on related party transactions, loan and capitalization as disclosed in Material Fact of April 9, 2019, (ii) updating by the appraiser of the Company's value in valuation, based on the latest financial statements made available by the Company, as of June 3, 2019. #### a. Revised IFRS pronouncements

#### I. Accounting standards recently issued and applicable in future periods

The following pronouncements will become applicable for periods after the date of these financial statements and were not early adopted:

• IFRS 16 – Leases – The pronouncement replaces IAS 17 - Leases, and related interpretations (IFRIC 4, SIC 15 and SIC 27). It eliminates the accounting for operating lease agreements for the lessee, presenting only one lease model, that consists of: (a) recognizing leases which terms exceeds 12 months and with substantial amounts; (b) initially recognizing lease in assets and liabilities at present value; and (c) recognizing depreciation and interest from lease separately in the result. For the lessor, accounting will continue to be segregated between operating and financial lease. This standard is effective for annual periods beginning on January 1st, 2019. Possible impacts arising from the adoption of this standard are being assessed and will be completed by the date this standard is effective.

#### Notes to the interim condensed financial statements

The Company monitors and controls risk exposure through several and different supplemental internal systems, including credit, financial, operational, compliance, tax and legal systems. The company believes that the involvement of the Committees/areas (including their subcommittees) with management and continuous risk control promotes a strict risk control culture in the organization as a whole. The commissions of Grupo BTG Pactual comprise senior members of the business units and senior members of the control departments, which do not depend on the business areas. Further details on risk management can be found at www.btgpactual.com.br/ri, in the Corporate Governance / Risk management section.

#### a. Market risk

Value at Risk (VaR) is the potential loss of value of the trading positions due to adverse movements in the market during a defined year within a specific level of confidence. Together with the Stress Test, VaR is used to measure the exposure of the Company's positions at market risk. The Company uses a historical simulation for calculation of VaR, applying real distributions and correlation amongst assets, not using Greek approximations and standard distributions. VaR may be measured in accordance with different years, historical data and reliable levels. The accuracy of the market risk methodology is tested through daily back testing that compares the compliance between VaR estimates and gains and losses realized.

The VaR presented below was calculated for a one-day year, level of level of confidence of 95.0% and one-year historical data. Reliable level of 95.0% means that there is 1 within 20 chances that the day trade net income remains below estimated VaR. Therefore, insufficiencies arising from net income expected from trade in a single day of trading exceeding the reported VaR would be expected to occur, on average, around once a month. Insufficiencies in a single day may exceed the VaR reported in material amounts. Insufficiencies may also occur more frequently or accrue during a longer year, such as the number of consecutive trading days. As it is backed up by historical data, VaR's accuracy is limited to its capacity to predict unprecedented market changes, as historical distributions in market risk factors may not produce accurate prognostics of future market risk. VaR methodologies and assumptions on different distributions may produce a materially different VaR. In addition, VaR calculated for a one-day year does not consider the market risk of positions that may not be settled or offset with hedges within the term of one day. As previously mentioned, the Company uses a stress test models as a complement to VaR method for its daily risk activities.

#### Notes to the interim condensed financial statements

As of September 30, 2019 (In thousands of reais)
