Report on review of quarterly information

To the Board of Directors and Stockholders B₂W - Companhia Digital

Introduction

We have reviewed the accompanying parent company and consolidated interim accounting information of B2W - Companhia Digital ("Company"), included in the Quarterly Information Form (ITR) for the quarter ended June 30, 2020, comprising the balance sheet at that date and the statements of income and comprehensive income for the quarter and six-month period then ended, and the statements of changes in equity and cash flows for the six-month period then ended, and a summary of significant accounting policies and other explanatory information.

Management is responsible for the preparation of the parent company and consolidated interim accounting information in accordance with the accounting standard CPC 21 - Interim Financial Reporting of the Brazilian Accounting Pronouncements Committee (CPC) and International Accounting Standard IAS 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB), as well as the presentation of this information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim accounting information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the interim information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying parent company and consolidated interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.

Other matters

Statements of value added

The quarterly information referred to above includes the parent company and consolidated statements of value added for the six-month period ended June 30, 2020. These statements are the responsibility of the Company's management and are presented as supplementary information under IAS 34. These statements have been subjected to review procedures performed together with the review of the interim accounting information for the purpose of concluding whether they are reconciled with the interim accounting information and accounting records, as applicable, and if their form and content are in accordance with the criteria defined in the accounting standard CPC 09 - "Statement of Value Added". Based on our review, nothing has come to our attention that causes us to believe that these statements of value added have not been properly prepared, in all material respects, in accordance with the criteria established in this accounting standard, and consistent with the parent company and consolidated interim accounting information taken as a whole.

Review of previous year's figures

The Quarterly Information (ITR) referred to in the first paragraph includes accounting information corresponding to income and comprehensive income for the three and six-month period ended June 30, 2019, changes in equity, cash flows and value added for the six-month period ended June 30, 2019, obtained from the quarterly information (ITR) for that quarter. The review of the Quarterly Information (ITR) for the quarter ended in June 30, 2019, was conducted under the responsibility of other independent auditors, who issued an unmodified review report dated July 30, 2019.

MESSAGE FROM MANAGEMENT

In 2020, we started the 3 year strategic plan (2020-2022), with the aim of driving accelerated growth and continued cash generation. In the first six months of the year, we faced a challenging scenario due to the COVID-19 pandemic, which brought enormous learning and motivated us to be even more agile, seeking innovative and creative solutions to generate value for the Customer and society as a whole.

With a complete digital platform integrated with the Americanas Universe, we practice to instill our commitment to be increasingly relevant in the daily lives of the customer, always with a focus on better serving them, offering: Everything. Anytime. Anywhere.

The Americanas Universe continues to reinforce its social role and conduct actions to combat COVID-19 in Brazil, including more than R\$ 62 million in donations for the transport of PPE, logistics services to São Paulo, construction of a field hospital in Rio de Janeiro, among others.

Throughout 2Q20, we challenged ourselves to implement, in record time, a series of actions aimed at revolutionizing the online shopping experience, at a time when the customer most needed convenience and security to meet their consumption needs.

We accelerated O2O (Online to Offline), which offers the best combination of the physical and digital worlds and has already established an important offering to serve customers. In 2Q20, the GMV from O2O reached R\$ 920 MM (+127% vs 2Q19).

We completed the integration of Supermercado Now and launched Americanas Mercado, allowing customers to buy their complete grocery basket, including fresh items, with a customized experience and same-day deliveries. In 2Q20, the category was the Company's largest in terms of units sold and represented a growth in sales of 7x vs. 2Q19. Thus, we started to expand the Supermarket operation, including the partnership with the Grupo Big, which will enable the service to be offered to customers in several states.

We created the Local Marketplace, which uses the neighborhood concept to deliver an increasingly complete assortment, connecting more than 4,000 physical stores (Americanas and Sellers), which, through the *ship from store* model, delivers products to the customer within two hours. Throughout the quarter, we entered into several partnerships to connect more and more merchants on the platform, including Ale Combustíveis, Ancar Invanhoe, BR Malls, BR Mania, Delivery Center, Multiplan, among others, which together have 20,000 physical stores.

The creation of the Local Marketplace also allowed us to accelerate our entry into new segments that have a high purchase frequency, such as the launch of the Restaurants category, which has already connected important *fast food* chains, such as McDonald's (+1,000 stores) and Bob's (+1,000 stores).

In order to operate all these initiatives and offer better delivery times to customers, we continue to invest in Ame Flash, our *crowdshipping* platform, which already has more than 20 thousand registered independent couriers and operates in more than 700 cities. Ame Flash, in conjunction with our proprietary logistics network and O2O initiatives, has allowed us to change the level of delivery times in Brazil. In 2Q20, we have already delivered more than 30% of orders on the same day, and our goal is to achieve more than 50% of same-day deliveries by 2022.

We remain committed to the objective of offering the best Brazilian online experience, through the differentiation of our platform, regardless of the strong growth in sales volume. Thus, while the market showed a strong deterioration in customer satisfaction indicators, our brands had a significant evolution in NPS, being the only representatives of eCommerce (large operations) with the RA 1000 seal, the highest level of reputation in Reclame Aqui.

Ame Digital, the fintech and mobile business platform of the Americanas Universe, surpassed the mark of 10 million downloads and continues to gain strong traction in Americanas and B2W (on-us) and other retailers in the physical and digital worlds (off-us). At the end of 2Q20, Ame had already connected more than 1.7 MM merchants, including the partnership with BR Distribuidora, which has been showing strong results with more than R\$ 100 MM in TPV and 1 MM transactions in just 45 days of operation. In July/20 the off-us already represented 60% of new accounts created.

As a result of these actions, in 2Q20, we achieved the highest level of sales in our history, exceeding the results attained in 4Q19, a period that includes major sales events such as Black Friday and Christmas. This result was driven by the increase in purchase frequency and the strong performance of new categories, which generated 95% growth in the number of orders and 171% in units sold (vs. 2Q19). In comparison with 2Q19, we added ~ R\$ 3 billion in sales in the guarter, with growth of 72% in Total GMV.

Our active customer base reached 19.3 MM at the end of June/20, totaling more than 5 MM new customers in the last 12 months. From January/20 to June/20, our apps were the most downloaded in the shopping category in Brazil, totaling 30.6 MM downloads and a monthly active user (MAU) base of 37.6 MM customers in June/20.

Even with the gradual reopening of physical retail, sales in July/20 and the beginning of August/20 continue at an accelerated pace, with no signs of deceleration, which demonstrates that 2Q20, which was more than an exceptional quarter, was an important inflection point in our growth trajectory.

The results achieved and the countless opportunities that present us, leave us extremely motivated to attain the strategic plan (2020-2022) and start a new journey of exponential growth, with the realization of monetization and expansion of our digital platform.

In this new journey, we will develop and expand our reach through scale and speed in new categories, generating growth, profitability and network effect in our e-commerce ecosystem and in the Americanas Universe.

Accordingly, we announced a private capital increase of R\$ 4 billion that will allow for the execution of our aggressive growth plan, including organic expansion, partnerships, and possible strategic acquisitions.

This movement does not change our commitment to continue generating cash, but it will allow us to have an even faster speed of execution to continue our e-commerce revolution in Brazil.

We remain firm in our purpose of CONNECTING PEOPLE, BUSINESS, PRODUCTS AND SERVICES and in fulfilling our important social role, especially in this moment of uncertainty.

We thank our team for their engagement and enthusiasm to better serve the Customer. We also thank our suppliers for the partnership, the Marketplace sellers for choosing our platform, the shareholders for their trust and, above all, the Customers for their preference.

Marcio Cruz CEO, B2W Digital

2Q20 HIGHLIGHTS

 - Ame expanded its financial solutions offering, with the creation of the Credit Marketplace which
 includes personalized loans offered by partners, such as BCredi, Creditas, Jeitto, and Rebel.
 - Ame Flash, crowdshipping platform that connects independent couriers, ended 2Q20 with more than 20,000 couriers registered and with presence in more than 700 cities.

STRATEGIC INITIATIVES

Commercial and Marketing

- Assortment: The number of items offered on the sites totaled 39.8 MM at the end of 2Q20, an increase of 226% vs. 2Q19, driven by Marketplace.
- Traffic: The number of visits to our sites and Apps surpassed the 1 billion mark in 2Q20, representing an increase of 102% vs. 2Q19.
- Marketing and SEO: With the exponential growth in the number of items offered (SKUs) came
 the necessity of improving the visibility of the assortment across our websites, and demonstrating
 to our customers the wide product offering and vast selection that can be found across our brands
 (one-stop-shop).
 - Organic Traffic: In 2Q20 the organic traffic increased 115%.
 - **SEO:** We were designated in the study "Os domínios mais presentes no top 10 Brasil", which was conducted by SEO specialist company, Convertion, as being awarded the first position for the Americanas brand and in the Top 5 with Submarino and Shoptime.
 - Local SEO: Integrated approach of the Americanas Universe (assortment of each store) bringing greater relevance to O2O modalities for customer navigation within search engines.
 - **Search Engine:** Intensive use of technology to design a new solution for page titles and descriptions, making information more clear for customers thus, allowing them to have a better experience in search engines.
- Americanas Empresas: A brand dedicated exclusively for the sale of products to corporate clients (legal entity with CNPJ), which aims to bring more facilities to companies, with a wide assortment, competitiveness and the benefits of the Americanas Universe. The Americanas Corporate clients can choose to purchase for the company's own use and consumption or purchase items for resale.
 - In 2Q20, the most sought after departments were PCs, Health, and telephony, with emphasis on the sale of essential items for companies in the midst of the pandemic.
 - In May/20, we started selling e-Gifts at Americanas Empresas, developing an option to purchase in bulk.

Evolution of the Marketplace

- **Assortment:** The B2W Marketplace assortment grew by 232%, going from a base of 11.8 million items in 2Q19 to 39.4 million items at the end of 2Q20.
- Americanas Mundo: The Cross Border operation that enables customers to purchase products from all over the world (including the US and China), creating a new growth avenue for the B2W Marketplace. Launched in March/19, the operation continues to develop rapidly.
 - In 2Q20, the Cross Border operation was expanded to Sou Barato, another growth front for the sale of international products.
- B2W Marketplace University: In 2Q20, more than 2 thousand Sellers received online training on the use of technology platforms. The training offered was highlighted in major media outlets, which reinforced the importance of training in the pandemic period.
- Uni360º: To further integrate the Seller's experience within the platform, the B2W Marketplace University implemented the Uni360º on the Partner Portal, a series of videos that assist the seller when registering items, encouraging an increase in assortment.

Mobile Platform

 Traffic: Throughout 2Q20, mobile traffic represented 81.5% of total visits, an increase of 6.9 p.p. compared with 2Q19.

- Apps: 92.6 million downloads of the brands' apps since inception. In the first six months of 2020, our apps totaled 30.6 million downloads. The Americanas app was the most downloaded in the shopping category in Brazil in 2Q20 and 1H20.
- MAU: Exiting 2Q20, the brand apps totaled 37.6 million active users (Monthly Active Users Source: App Annie).

UX (Customer Experience):

- Local Marketplace: The same convenience structure developed for Americanas physical stores, is now available on the Marketplace. In this way, Sellers of different categories can make their sales for delivery or pick up on the same day.
 - Special Showcase: Allows for the availability of selected promotions with prominent display and the option of a banner for the promotion of campaigns aimed at seasonal events.
 - Regional Offer: Allows for the browsing of assortment in a regionalized way, with a highlight on the product page for the buy and receive today modality.
 - Store share: We launched the option to share a store within the Buy and Receive Today modality. This action is aimed both at users who browse our sites and applications, as well as at the establishment's operation to disseminate information, offers and news for your region.
- Americanas Mercado: We integrated the online Supermarket shopping platform, Supermercado Now, as a mini app, creating Americanas Mercado, to offer greater convenience to customers.
- Freight menu: In June/20, we started to display a range of dates on the site instead of showing a
 delivery deadline in business days, thus increasing conversion rates.

Submarino

- New menu in the App: We updated the Submarino App menu layout, increasing the agility
 of navigation between product categories and facilitating the exposure of all available
 content and assortment. The new menu has the categories, highlights, and services
 presented in "cards" to make navigation more intuitive and accessible.
- Furniture assembly: Customers who purchase products from the furniture department can also choose to hire the assembly service, with specialized service and a 3-month warranty.

Shoptime

- Floating Button: We have included a floating "buy" button on the Shoptime product pages
 that allows the customer to be directed to their cart from anywhere on the page, increasing
 conversion rates. In this new area, we display the items best price, payment terms, and
 cashback.
- Video on the product page: In order to highlight the video content on the Shoptime mobile product page, we created a display button. After the improvement, we experienced a 49% increase in conversion rates among customers who watched the videos.

• B2WADS:

With a specialized team of more than 50 people divided across the Business and Technology fronts, B2WADS is a complete advertising platform focused on leveraging the sale of business partners, including Sellers and suppliers. The platform offers advertising solutions with an integrated O2O approach, allowing for customer impact at various points in the purchase journey.

- In 2Q20, B2WADS posted a 283% growth in revenue versus 2Q19, in addition to a significant increase in profitability.
- o In the quarter, several features were developed with a focus on the Marketplace Seller, with the automation of the Seller's experience when investing in advertising and a more integrated exposure with the sales algorithm of B2W websites.
- Throughout 2Q20, there was a 300% increase in investments from players in the Consumer Goods industry, who have been exploring options for display media, performance, and other special formats. Customers such as Nestlé, Nespresso, L'Oréal, and Unilever have utilized the B2WADS O2O focused advertising solutions.

Financial Services

- Credit Promotion: Throughout 1H20, B2W and Cetelem's joint venture (Submarino Finance and Digital Finance) recorded volume of R\$ 1.8 billion in approved transactions. In the same period, the receivables portfolio for these operations was R\$ 1.5 billion.
 - In June/20, the Credit Promoter reported 3.4 MM cards issued (2.0 MM on Submarino Finance and 1.4 MM on Digital Finance, which includes the brands Americanas.com, Shoptime and Sou Barato).
- Credit Seller: Marketplace Sellers can access loans quickly, securely, simply, and 100% online. The contracts can be made for payment in installments (installment credit) or in full payment (single installment credit) and, aiming to meet the requests of the Sellers, we implemented innovations in the functionalities and methods of contracting these products:
 - Credit in installments now have a longer payment term, and can reach up to 24 months.
 - We implemented Credit Seller as a payment method in B2WADS, allowing for greater media investments by Sellers.
 - Partnership with the Americanas Empresas brand, with the possibility of purchasing negotiations to replenish inventory as if they were in cash, however, with the flexibility in the terms of the payment method, through the Credit Seller.
 - At the end of 1Q20, we implemented a new type of credit, Flex Credit, which allows the Seller to define a fixed percentage to be committed to its sales. In this new product, the Seller has a completely flexible operation that adapts to the seasonality of its sales on the platform.
 - As a measure to support the impacts of the COVID-19 pandemic, we expanded the
 base of Sellers eligible for credit, opened up the possibility of renegotiating contracts,
 offering longer terms, reducing the value of the installment and treating, on a caseby-case basis, the best conditions so that our Sellers are impacted as little as
 possible in that period.
 - In August/20, the FIDC proposal of B2W (Sellers) and Ame Digital (Merchants), in partnership with Integral Investimentos, dedicated to granting credit to MPMEs, was prioritized by BNDES (moving on to the next phase of analysis and diligence) to integrate a set of initiatives of the bank to face the impact caused by COVID-19. BNDESPAR will invest up to R\$ 4 Billion in the credit funds and may invest up to R\$ 500 Million per fund.

• Customer Service

 - Integrated Platform: The integrated logistics services platform increases crossselling, allowing Sellers to connect complementary logistics services, such as B2W Fulfillment, Click & Collect and Ship from Store.

 B2W Fulfillment: Reached a total of 908 Sellers connected, with their inventory operated by the platform, ensuring shorter lead times and more competitive freight costs. Through B2W Fulfillment, the customer gets the best shopping experience, where the entire logistics process (inventory, transportation and fulfillment) is operated by B2W.

• IF - Innovation and Future

Faced with the context of accelerated transformation of the physical and digital worlds, and in order to capture the opportunities generated by this new business environment, in 2018, IF – Innovation and Future was created, outside Americanas and B2W operations. IF was conceived with the mission of creating disruptive business and leveraging various initiatives of the Companies. IF's main verticals include: incubating new business, accelerating existing initiatives, investing in startups (venture capital), leading the O2O fronts, and prospecting new opportunities, including M&A operations.

- Ame: Fintech and mobile business platform, and among the first initiatives of IF, continues to accelerate and deliver impressive metrics.
 - Ame Digital reached 10.1 million downloads and continues to gain strong traction at Americanas and B2W, optimizing the offer of discounts to customers through cashback, generating greater purchase frequency and increasing Customer spending.
 - Ame connected more than 1.7 MM merchants from the physical and digital worlds (off-us). In July/ 20, off-us already represented 60% of the new accounts created.

 - Ame accelerated the partnership with BR Distribuidora, which has already registered more than R\$ 100 MM in TPV and 1 million transactions via QR Code in the first 45 days of operation, making it possible to pay quickly and securely with Ame.
 - Ame has integrated with new technology platforms to expand acceptance in the online world. Throughout 2Q20, Ame Plus was connected to the Magento, WooComerce and Payhow.
 - In June, the Ame Scan&Go pilot was launched, which allows customers to scan the barcode of products in the store and pay with the app, without having to go to the cashier.
 - Ame Digital already has more than 45 features, with the aim of simplifying the lives of customers.
- Ame Flash: In order to accelerate O2O initiatives, Ame Flash connects independent couriers (motorcycle, bicycle, and other modes), enabling for the delivery of products to customers within 2 hours, from the 1,700 physical stores of Americanas and the physical stores of B2W Marketplace Sellers. The app already has 20 thousand couriers and has surpassed the mark of 700 cities served.

• Digital Team

Summer Job Program: The program selects students from the best universities to work on the Company's projects. In June/ 20, we received 9 students from international schools who, in addition to carrying out the development of the project, are participating in meetings with managers, as well as technical and behavioral training with the Human Resources team.

- Meetups: In 2Q20, B2W Digital continued the rounds of meetups, holding more than 10 meetings in an online format. The meetings are moments of exchange of information and experiences on a specific topic, involving professionals from the technology communities and other topics, with the B2W team. During this period, we had meetings with the communities of "Recursos Humanos", "Mentoria", "CyberSecurityGirls BR", "Perifacode", and "Node.js Rio", among others.
- Giro 360°: For the purpose of promoting knowledge and interaction between the areas of the Company. In 2Q20, 14 presentations were made involving business and technology areas of the Americanas Universe, providing global business knowledge and vision about the reality and performance of the Company.
- On LET'S: In 2Q20 we launched On LET'S, an online workshop for the leadership of our Fulfillment Centers, which addresses topics chosen by the managers themselves. Since May/20, we have held 14 Talks, with themes such as "Culture of Engagement", "CNV - Non-Violent Communication" and "Leader Communicator".
- Online Learning: We promoted changes in our training that began to be conducted 100% online. In 2Q20, more than 50 training sessions were held on various topics, such as Adobe, Machine Learning, Power BI, Python, Salesforce, Scrum, Treinamento de Entrevistas, DRE, Canvas, Oratória, PDCA, PDI, Excel, Process Management, Financial Management, Indicators, among others.

Corporate Governance and Sustainability

In line with the Global Compact principles and the Agenda 2030 Sustainable Development Objectives (SDO), a United Nations initiative, in 2Q20 we continued advancing our sustainability strategies.

- COVID-19 Donations: The The Americanas Universe continues to reinforce its social role and conduct actions to combat COVID-19 in Brazil, including more than R\$ 62 million in donations for the transport of PPE, logistics services to São Paulo, construction of a field hospital in Rio de Janeiro, among others.
- ISE: For the sixth consecutive year, B2W was selected for the ISE portfolio, B3's Corporate Sustainability Index, which assesses companies' commitments to sustainable development and recognizes those that promote best practices.
- Pacts, commitments and ethics: B2W is a signatory to the Business Pact for Integrity and Anti-Corruption, an initiative developed by the Ethos Institute, which aims to unite companies and promote a more honest and ethical market, eradicating bribery and corruption. It is also part of the UN Principles of Women's Empowerment, as well as the "Business Coalition for Racial and Gender Equity" and the "Business Charter for Human Rights and the Promotion of Decent Work", both from the Ethos Institute.
- Diversity and Inclusion: We enable the sites to be accessible to people with hearing, visual and motor disabilities through Hand Talk and Essential Accessibility, enabling the site to be read in sign language (for the hearing impaired), out loud (for the visually impaired), and only with eye movement (for the disabled).
- Social Impact: The Jirau da Amazônia project, carried out in partnership with the Amazonas Sustainable Foundation, promotes the sale of products by local indigenous and riverside artisans on the Americanas digital platform throughout Brazil, with the proceeds reverted to the development of the project. In light of the social distancing and the prohibition of tourist activity in the communities, Jirau da Amazônia is the only means of selling products by artisans.
- Operation Carbon Neutral: As a way to contribute to SDG 13, Action Against Global Climate Change, we offset greenhouse gas (GHG) emissions, becoming a Carbon Neutral operations Company. Altogether, the compensation of B2W and the parent company Americanas contributed

- to avoid 1.4 million tCO2eq of emissions per year, in addition to supporting the conservation of 1.1 million hectares of the Amazon Forest.
- Annual Report 2019: In line with our commitment to sustainable development and improvement to communicate the Company's performance, for the sixth consecutive year, the guidelines outlined by the Global Report Initiative (GRI) were adopted in the global indicator model for reporting sustainability. ANNEX III: NOTE REGARDING FINANCIAL STATEMENT

Effects in the consolidation of B2W Digital's transportation subsidiaries

BFF Logistics and Distribution, a subsidiary of B2W Digital, provides merchandise distribution services to the Company, generating an elimination effect in consolidated gross revenue and selling, general and administrative expenses (distribution expenses), according to the present accounting rules.

Consolidated gross profit is reduced in proportion to the positive effect observed on selling, general and administrative expenses, but no effect on Adjusted EBITDA and Adjusted EBITDA Margin.

Adjusted EBITDA

On October 4th, 2012, Brazilian Securities Exchange Commission (CVM) enacted Instruction 527/12, regarding the voluntary disclosure of non-accounting information such as EBITDA. The Instruction aims to standardize the disclosure, in order to improve the understanding of this information and make it comparable among publicly listed companies.

In order the maintain consistency and comparability between previous periods, we present the reconciliation of EBITDA.

In 2Q20, Adjusted EBITDA was R\$ 184.7 million. Including other operating income and expenses and the equity income, EBITDA, according to CVM Instruction 527/12, would be R\$ 157.8 million in 2Q20 (6.5% of NR) vs. R\$ 97.7 MM in 2Q19 (6.6% of NR).

Consolidated EBITDA Reconciliation - R\$ MM	2Q20	1Q19	Δ %	1H20	1H19	Δ %

Notes to the individual and consolidated financial statements On June 30, 2020

(In thousands of Reais, unless otherwise stated)

1 Operational context

B2W - Companhia Digital ("B2W" or "Company"), with head offices at Rua Sacadura Cabral, 102, in the City and State of Rio de Janeiro, incorporated through the merger of Americanas.com S.A. - eCommerce (Americanas.com) and Submarino S.A., with shares traded on the Novo Mercado B3 S.A. - Brasil, Bolsa, Balcão under the ticker BTOW3. B2W is controlled by Lojas Americanas SA ("LASA" or "Parent Company"), a publicly traded company with shares traded on B3 S.A. - Brasil, Bolsa, Balcão under the ticker LAME3 - ON and LAME4 - PN.

The Company and its subsidiaries (collectively, "the Group") operate on the following fronts: e-commerce, through its brands, Americanas.com, Submarino, Shoptime, Sou Barato, and Supermercado Now; credit card administration and promotion; technology platform; logistics platform, distribution and customer service platform, *Marketplace*, and digital payment account through Ame.

B2W offers technology services through BIT Services, which is the result of the construction of a disruptive, robust and innovative technology platform to support the growth of the Company. On the logistics vertical, B2W offers services of storage, distribution and customer services to its partners through its B2W Fulfillment (BFF) platform. Finally, consumer credit services are another important part of B2W Digital's platforms, through which the Company offers private label credit cards for its four main brands, Americanas.com, Submarino, Shoptime and Sou Barato.

Corona Vírus Pandemic - COVID 19

B2W sent a notice to the market on April 6, 2020 and its parent company, Lojas Americanas, sent a notice to the market on April 6 and 14, 2020, informing that they created the "Crisis Committee – Americanas Universe" to:

- (i) Monitor the daily evolution and imact of the COVID 19 pandemic;
- (ii) Prioritize actions that preserve the health of our associates and customers;
- (iii) Addressing the necessary responses to the crisis;
- (iv) Ensuring that the Americanas Universe continues to fulfill its social role, providing products and services necessary to the population through physical and digital platforms and adjusting our assortment to better face the current challenges;
- (v) Establish collaborative initiatives in order to offer relevant contributions to society in this difficult time that we are experiencing; and
- (vi) Ensuring consistent and fluid communication with key stakeholders, as well as establishing social impact partnerships with public and private entities.

The Americanas Universe consists of a physical platform (Americanas) and a digital platform (B2W Digital) that complement each other and allow to meet the needs of customers in different ways.

The Brazilian government has been taking actions to contain the spread of the virus since the second half of March 2020. The recommended social distancing, the compulsory closing of stores, and the consequent reduction in consumption in physical stores, took place more broadly from April 2020. On the other hand, the growing social distancing contributed to lift sales of B2W and the number of users of the O2O services (online to offline).

Throughout the quarter, B2W was 100% available to serve the population across the country and performed very well. To increase the supply of items and support local commerce, new sellers were connected to the B2W marketplace, further increasing the number of items offered.

Even considering the scenario of uncertainties regarding the eradication of the pandemic outbreak for the normal resumption of activities and its negative impact on the country's economy, management assessed the effects subsequent to the June 30 quarterly information, including in its projections of results and cash generation, applying its best estimate, and concluded that there is no need to record provisions for losses on non-financial assets, and there are no material adverse effects on its operations that put its operational continuity in doubt. The Companie

will continue to monitor the situation of the pandemic in order to keep their projections of generation of results up to date and corresponding analysis of any effects on their financial statements.

2 Main accounting policies

The main accounting policies applied in the preparation of these quarterly information are defined below. These policies were consistently applied in the semesters presented, unless otherwise stated.

2.1 Basis of preparation

The individual interim financial information was prepared in accordance with technical pronouncement CPC 21 (R1) - Interim Statement and the consolidated interim financial information in accordance with the rules of CPC 21 (R1) and IAS 34– Interim Financial Reporting issued by IASB – International Accounting Standards Board and presented in a manner consistent with the rules issued by the Brazilian Securities and Exchange Commission, applicable to the preparation of the Quarterly Information - ITR.

In accordance with CPC 21 (R1) - Interim Statement and in Management's assessment of the relevant impacts of the information to be disclosed, the explanatory notes described below are not being presented. The others are being presented in order to allow a perfect understanding of this quarterly information if read in conjunction with the explanatory notes disclosed in the financial statements of December 31, 2019.

Explanatory notes not shown:

- Accounting practices and policies;
- Critical accounting estimates and judgments;
- Credit quality of financial assets;
- Anticipated revenue; and
- Insurance coverage.

The issuance of these quarterly information was authorized by the board of directors on August 5, 2020.

2.2 Accounting practices and policies

Accounting policies are being presented in a manner consistent with the accounting practices adopted in the individual and consolidated financial statements for the year ended December 31, 2019. Therefore, this quarterly information should be read in conjunction with the information disclosed in the financial statements for the year ended December 31, 2019.

2.3 Presentation of segment information

The activities of the Group are concentrated in the marketing of products and delivery of services by various means of non-presence marketing, especially the Internet. Despite the diversity of products sold and services provided by the Group (e-commerce, consumer finance service platforms; technology platform; logistics, distribution and customer services platform; Marketplace; and the digital payment account), such activities are not controlled and managed by the Management as independent operational segments, as their accompanying results are monitored, tracked, and evaluated in an integrated manner. Thus, Management understands that the Company is organized, basically, as a single business unit. The Group also operates in the area of financial products through the subsidiary Submarino Finance Promotora de Crédito Ltda. and Digital Finance Promotora de Crédito Ltda, which, by not achieving the minimum quantitative and qualitative parameters, is not being presented as a separate operating segment.

2.4 Present value adjustment

The operations of long-term purchases, primarily from suppliers of goods and services, were adjusted to their present value taking into account the maturities of these transactions. The average rate used of 3.48% per annum

(p.a.) on June 30, 2020 (5.86% p.a. at December 31, 2019), funding base for the base dates. The constitution of the present value adjustment of purchases is recorded under "Suppliers" (note 17) against the "Inventories" account (note 9) and the counterpart entries are shown under the heading "Financial Expenses" (note 27), through the maturity date, in the case of suppliers, and for the realization of inventories based on the amounts recorded under the heading "Cost of goods sold and services provided."

The operations of long-term transactions, at the same previously-agreed prices as represented, mainly, through credit card installment sales, were brought to their present value taking into account the payment deadlines of the aforementioned transactions. The average rate used of 4.37% p.a. at June 30, 2020 (6.31% p.a. as of December 31, 2019), was based on receivable discounts on their respective base dates. On the identified adjustments, the tax rates were applied on the respective base of dates. The present value adjustment of installment sales has a counterpart entry under the heading "Accounts receivable from clients" (note 8) against the "Sales Revenue" (note 25) account and its realization is recorded under "Financial revenues" (note 27) through the maturity date.

3 Accounting estimates and judgment

Accounting estimates and judgment are continually evaluated, and are based on historical experience and various other factors, including expectations of future events, which are believed to be reasonable under the circumstances. Until the semester ended June 30, 2020, there were no changes in accounting assumptions and estimates in relation to those disclosed in the financial statements of December 31, 2019.

4 Management of financial risk

4.1 Financial risk factors

In the normal course of business, the Group is exposed to market risks related to the fluctuation of interest rates and exchange variations, as well as credit risk on its installment sales and liquidity risk. Under monitoring carried out by its officers and management, and supervised by the Board of Directors, the Group uses hedge instruments to minimize exposure to these risks. These administrators determine what strategies are to be adopted and Management contracts appropriate hedge instruments for each circumstance and inherent risk.

The Group does not have options, *swaptions*, repentance swaps, flexible options, derivatives embedded in other products, structured derivative transactions and "exotic derivatives". The Group does not operate derivative financial instruments for speculative purposes, thus reaffirming its commitment to the conservative cash management policy, whether in relation to its financial liabilities or its cash position.

(a) Market risk

(i) Exchange rate risk

The Group uses traditional swaps to offset exchange losses arising from sharp devaluations of the Real (R\$) against these foreign currency deposits.

Traditional swaps (registered in the borrowings and financing account):

The counterparts to these traditional swaps are the financial institutions that provide loans in foreign currency (US dollars and Euro). These CDI-referenced swaps aim to cancel exchange risk, transforming the cost of the debt (note 18) to local currency and interest rates, varying at 121.95% to 122.60% of the CDI. These contracts, at June 30, 2020, amounted to a reference value of R\$ 500,000 for the Parent Company and in the Consolidated (R\$ 800,000 on December 31, 2019, for the Parent Company and in the Consolidated). These operations are matched in terms of amount, terms, and interest rates. The Group intends to settle such contracts simultaneously with the respective loans. In this type of operation there are no contractual terms of margin call. The are no contractual clauses for margin calls in this type of transaction.

At June 30, 2020 and December 31, 2019, the position of these derivative financial instruments was as follows:

		Parent Company		Consolidated
	June 30, 2020	December 31, 2019	June 30, 2020	December 31, 2019

Considering that the Group's exposure to the risk of wide swings in currency exchange rates is mitigated by traditional swap operations, contracted for exchange protection purposes and, therefore, simultaneously with the respective foreign currency borrowings, the change in the rate of the US dollar and Euro compared to the real due to the current market conditions does not produce any significant impacts on the Group's financial information.

(ii) Interest rate risk

The Group uses resources produced by operational activities to manage its operations, as well as to guarantee investments and growth. In order to complement its cash requirements for growth, as well as to support cash investments, when necessary, the Group obtains loans and financing from the main financial institutions in the country, which are substantially (around 82% of total) indexed to the variation of the Interbank Deposit Certificate (CDI). Relevant fluctuations in the CDI (see sensitivity analysis in item (d) below) raise the possibility of inherent risk. Financial investment policies indexed by the CDI partially mitigate this effect.

(b) Credit risk

Credit risk is managed at the corporate level. Credit risk stems from cash and cash equivalents, derivative financial instruments, deposits in banks and other financial institutions as well as exposure to client credit. With regard to banks and other financial institutions, the individual risk limits are determined based on internal or external classifications according to the limits set by the Board of Directors. The use of credit limits is regularly monitored. Sales to retail clients are settled in cash or through the main credit cards existing in the market.

The credit risk is minimized by the fact that approximately 83% of the Group's sales are conducted through credit cards administered by the main credit card operators, which have excellent levels of risk classification. The Group maintains a provisions for estimated credit losses by management, that is considered sufficient to cover possible losses on its receivables.

(c) Liquidity risk

Management continuously monitors forecasts for the liquidity requirements of the Group in order to ensure that it has sufficient cash to satisfy its operating needs. This forecast takes into consideration plans for financing the Groups's debt, compliance with clauses, compliance with internal targets for the asset balance quotient and, if applicable, external or legal regulatory requirements - for example, currency restrictions.

The Treasury invests excess cash in interest-bearing bank accounts, term deposits, short-term deposits and securities, choosing instruments with appropriate maturities with sufficient liquidity that offer a sufficient margin as determined by the aforementioned forecasts.

The table below analyzes the non-derivative financial liabilities of the Group and the derivative financial liabilities that are settled on a liquid basis by the Group, through common maturity periods that correspond to the period remaining between the date of the calculation of the net equity balance and the contracted date of maturity. Derivative financial liabilities are included in the analysis if their maturities are essential for an understanding of the cash flows.

4.2 Capital management

The goal of the Group with regard to capital management is to ensure the continuity of its operations, to offer a return to shareholders and benefits to other stakeholders, as well as maintaining the ideal capital structure to minimize associated costs.

The Group monitors the levels of its indebtedness through the Net debt/EBITDA ratio, which in its understanding represents the most appropriate manner to present the debt metric, because it reflects consolidated net financial obligations requiring immediate cash for payments, considering its operating cash generation.

4.3 Fair value estimate

It is assumed that the book value of the balances of client accounts receivable and suppliers accounts payable, minus impairment in the case of accounts receivable, are close to their fair value. The fair value of financial liabilities, for disclosure purposes, is estimated using discounted contractual future cash flows at existing market interest rates, which are available to the Group through similar financial instruments. The Group uses a market approach to estimate the fair value of its financial instruments.

The Group applies CPC 46/IFRS 13 to the financial instruments measured in the balance sheet at fair value, which requires disclosure of the fair value measurements by level in the following hierarchy:

- (Level 1) Quoted (unadjusted) prices in asset markets for identical assets and liabilities to which an entity may have access at the measurement date.
- (Level 2) Insertions different from the price quotes negotiated in active market included in Level 1 that are observed

- for assets or liabilities, whether directly (that is, as prices) or indirectly (that is, price derivatives).
- (Level 3) Insertions for assets or liabilities that are not based on data adopted by the market (that is, non-observable insertions).

The following table presents the Group's assets and liabilities measured by fair value through profit or loss as of June 30, 2020.

(c) Other information on subsidiaries

On January 13, 2020, the Company acquired the totality of the shares of SuperNow Portal e Serviços de Internet Ltda. ("Supermercado Now"), an innovative e-commerce platform focused on the Supermarket category in Brazil.

The value of the transaction is up to R\$ 33,000, distributed as follows:

(i) R\$ 15,015, due to the acquiree, with R\$ 1,181 being paid in cash and most of the remaining amount being subject to the achievement goals by 2022. The updated balance on June 30, 2020 is R\$ 13,835 (note 20) to be settled by 2024; and

(ii) R\$ 17,985 to settle Supermercado Now's obligations with third parties through the payment of capital, of which R\$ 15,594 was paid at the time of the acquisition and R\$ 2,391 to be paid in the next 4 years.

The goodwill totals R\$ 30,269 and was calculated based on the expectation of future profitability, arising from the benefit generated to the company by expanding its operations in the food retail segment, offering a more complete assortment to the customer base. The goodwill, calculated based on the company's accrued unsecured liabilities, consists of:

Accrued Unsecured Liabilities of Acquiree (1)	(15,254)
Consideration (2)	15,015
Goodwill (2) - (1)	30,269

The Company expects to complete the studies to determine the assets and liabilities at fair value and the consequent allocation of the purchase price by the end of fiscal year 2020.

In accordance with Technical Pronouncement CPC 01 (IAS 36), items of property, plant and equipment, which show signs that their recorded costs are higher than their recovery values, are reviewed annually to determine the need for a provision to reduce the balance book value at its realization value. Management did not identify changes in circumstances or signs of technological obsolescence, nor evidence that its assets used in its operations are not recoverable in view of its operational and financial performance and concluded that, as of June 30, 2020 and December 31, 2019, there was no need to record any provision for loss on property, plant and equipment.

⁽i) the weighted average CDI rate on loans taken out by the Company in the semester ended on June 30, 2020 and June 30, 2019 was 144.9% and 125.9%, respectively.

(a) Goodwill on acquisition of investments

The Company annually evaluates impairment, with the latest assessment conducted upon the closing of the year ended December 31, 2019. This goodwill calculated from investments and mergers stemming from the expectation of future profitability, based on the projections of future period earnings for 10 years, using a pre-tax discount rate of 9.4% to discount future estimated cash flows, plus more or less of the assets and liabilities in a business combination.

The business model adopted by the Company corresponds to a vertical structure, as a result, the consolidated balances represent, in a more adequate way, the only cash generating unit (CGU), see note 2.3, which is considered for the impairment test, therefore, there is no impact on the possible negative results of the investees.

The goodwill balances determined on acquisition of equity interests are supported by technical appraisals based on expected future profitability. The company monitored the assumptions used and did not identify loss indicators nor the necessity of a new evaluation on June 30, 2020.

As of June 30, 2020 and December 31, 2019, the goodwill from the acquisition of investments was represented as follows:

				Parent Company				Consolidated

(b) Development of websites and systems

Represents expenses with e-commerce platform (development of technological infrastructure, content, applications and graphic layout of sites), expenses with ERP system implementation and development of own systems, being amortized in a linear way considering the stipulated period of use and benefits earned.

Following its path of innovation, B2W has proceeded to invest in new features, designed mainly to improve the purchase experience, increase the conversion rate and strengthen the positioning of its brands, as well as implementing new operating functions for the Company.

The Company used the same assumptions in item (a) above for the impairment test of intangible assets and did not identify the need for a provision for recoverability of assets.

(c) Right of use mining

The Company reacquired from LASA the amount of R\$ 16,500 related to the use of mining in telecommunication means (internet, teleshopping, among others), resulting from the finalization of the partnership between LASA and Itaú Unibanco Holding SA and recorded the said amount as an intangible asset.

16 Lease Assets and Liabilities

As of June 30, 2020, the Group has contracts classified as leases for their commercial, logistics and administrative units.

The measurement of the cost of the right to use real estate assets corresponds to the net value of the lease liability, calculated on the lease provided for in the contracts, discounted to present value at the projected rates and terms provided for in these lease agreements, this being the non-cancellable period and covered by the option to extend the lease, if the Group is reasonably certain to exercise this option. The monthly depreciation of the right to use real estate assets is calculated, on a straight-line basis, over the term provided for in the contract, regardless of the renewal clause in accordance with the Group's internal policies.

In order to calculate the cost of the right to use real estate assets and the value of the lease liability, the Group used the nominal incremental interest rate to discount the actual flow of payments to present value.

Below we present the assets to the right-of-use assets and the corresponding obligations:

^{(*) -} The Company, in accordance with the Technical Pronouncements Review No. 16/2020, issued by the Accounting Pronouncements Committee, which exceptionally authorizes changes due to benefits obtained in lease agreements related to Covid -19, recognized in the income for the year the amount of R \$ 1,064 in the parent company and in the consolidated, originating from the fixed installments of the contracts negotiated with the tenants.

(c) Commmitments assumed – Lease agreements

The Group maintains a Private Instrument of Rental Agreement for Commercial Property and Other Covenants for all their properties, with short and long term maturities, whose rent is updated annually based mainly on the IGP-M and IPC-A.

According to CPC 06 (R2) / IFRS 16, lease liabilities were recorded as lease liabilities under contracts with a validity of more than 12 months. The rent corresponding to short-term contracts continues to be recognized, by competence, as occupancy expense.

In the semester ended June 30, 2020, the Group incurred rental expenses on short-term contracts and other related to real estate in the amount of R\$ 1,696. Future commitments related to these contracts total R\$ 1,841.

Tax

Refer mainly to tax assessment notices issued for collection of supposed ICMS debt.

Labor

The Group are also parties to lawsuits involving labor. None of these lawsuits refers to individually significant amounts, and the lawsuits mainly involve claims for overtime, among others.

Cívil

The Company is a party, together with its subsidiaries, in lawsuits arising from the normal course of its operations and its subsidiaries, primarily related to consumers, accounting, on June 30, 2020, for the amount shown as contingent liability related to these issues. None of these lawsuits refers to individually significant amounts.

(b) Contingent liabilities not provided

On June 30, 2020, the Group had administrative and legal demands of a fiscal, civil and labor nature, classified as "possible loss" by the legal advisors, and, for this reason, no provision was made. The approximate amount of the lawsuits is R\$ 786,933 (R\$ 824,225 on December 31, 2019) in the parent company and R\$ 1,120,124 (R\$ 1,148,198 on December 31, 2019) in the consolidated.

The main variations that occurred in the semester are basically due to monetary updates and prospects for new and existing processes, which are in accordance with the criteria and with the information disclosed in the Financial Statements of December 31, 2019.

At Board of Director meetings, held on May 21 and June 30, 2020, the capital increase was approved with the issue of 1,242,908 and 181,895 common shares, respectively, largely paid for by capitalization of reserves, granted under the terms of the Shares approved by the General Meeting of August 31, 2011.

24 Share-based payment

Remuneration costs arising from the Company's share-based payment plan for the period ended June 30, 2020 were R\$ 8,706 (R\$ 10,899 at June 30, 2019). The compensation costs are recorded in equity in capital reserve - reserve of recognized options granted, since the options, when exercised, are settled through the issuance of new shares or the use of shares held in treasury. The remuneration cost corresponds to the fair value of the B2W Plan, calculated on the grant date, recorded during the service provision period that begins on the grant date until the date on which the beneficiary acquires the right to exercise the option.

The compensation costs of the Plan to be recognized by the Company for the remaining period of service rendering to occur based on the assumptions used total approximately R\$ 26,054 on June 30, 2020 (R\$ 33,717 on December 31, 2019).

Based on the shareholding composition of the capital stock on June 30, 2020, the maximum percentage of share dilution to which the current shareholders of the Company will eventually be subjected in case of exercise of all options granted is less than 1%.
